

OUR TESTIMONIAL

DECUS INSURANCE BROKERS

Who are Decus Brokers?

Decus Insurance Brokers Ltd is a vibrant, proactive and professional London based Insurance Broker offering both effective and niche insurance solutions to the international insurance market place.

What was their challenge?

Decus Insurance Brokers' business is very reliant on electronic trading and almost 50% of their income is derived through this method of placement, with this in mind, it is crucial that there is a seamless service for clients as Decus works remotely. It is vital that every function of their business can be performed remotely.

How Sedcom solved the issue

Decus followed the advice of Sedcom and collectively, they agreed on a resilient, secure platform, built to withstand business disruption. This solution encompasses amongst other things, Cloud services, 2FA, and a Managed Firewall Appliance.

The final outcome

Sedcom have provided a robust platform that can deal with the increased demand of working remotely and the changing needs of our business. The experience for staff and clients has been seamless as we progress into Business as Usual whilst working remotely. This is testament to the infrastructure, team and operations within Sedcom.
